**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to Amendment filed on Oct. 06, 2006.

2. Claims 1-17 have been canceled.

3. Claims 18-34 have been amended.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 18-20, 22 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Sato et al. (6,512,819).

   Regarding claims 18-20, and 22, Sato discloses a telephone apparatus comprising: comprising

   memory card connection means adapted to receive a memory card and to function as an interface for said memory card (see fig.1, elements 103, 104 and description),

   content data input means for inputting content data, with respective parts of said content data being received by communication with corresponding ones of plurality of opposite parties (see fig.2, TELEPHONE NUMBER and its description),
a database having plurality of sets of identifier information corresponding to respective ones of said opposite parties stored therein beforehand, for use in identifying said opposite parties and thereby enabling said parts of said content data to be correlated with said corresponding opposite parties (see fig.2, TELEPHONE NUMBER and its description),

data relating means for associating said part of said content data with said sets of identifier information, to derive associated content data (see fig.2, and its description), and

content data storing means for storing said associated content data and identifier information in said memory card, while said memory card is connected to said memory card connection means (see fig.1, elements 103, 104 and its description).

Regarding claim 26, Sato discloses a telephone apparatus comprising:

a content input step of inputting content data (see fig.2, and its description);

a data relating step of associating, with said inputted content data, opposite party identifier information for use in distinguishing respective parts of said content data (see fig.2, TELEPHONE NUMBER and its description), and

a content data storing step of storing said associated content data and personal information in a memory card that is connected to memory card connection means (see fig.1, elements 103, 104 and its description).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

7. Claims 21, and 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al. (6,512,819).

Regarding claims 21, and 23-25, the Examiner takes Official notice that these features are notoriously well known in the art in order to provide the use of storing in telecommunication devices.

**Conclusion**

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
